

Preferred Scenario Map Amendment Request PSA-25-01

904 Francis Harris Lane

Conservation/Cluster to
Commercial/ Employment Low

Summary

Request:	Change from Conservation/Cluster to Commercial/Employment Low on the Preferred Scenario Map.		
Applicant:	Arbrust & Brown, PLLC, 100 Congress Ave, #1300 Austin, TX, 78701	Property Owner:	Highlander SM One, LLC P.O Box 470249, Fort Worth, TX 76147 Donald and Germaine Tuff C/O: Kristen Quinney Porter P.O Box 312643, New Braunfels, TX 78131

Notification

Application:	December 30 th , 2024	Neighborhood Meeting:	N/A
Published:	March 9, 2025	# of Participants	N/A
Posted:	March 7, 2025	Personal:	March 7, 2025
Response:	2 speakers at Citizen Comment Period for the P&Z / City Council information presentations, see speaker list from 3/25/25 P&Z Meeting on the next page.		

Property Description

Legal Description:	Approximately 199.49 +/- acres of land, more or less, out of the A.M Esnaurizar Survey, Abstract No. 6		
Location:	Generally located on the western side of Francis Harris Lane, south of the intersection between Grant Harris Rd and Francis Harris Lane		
Acreage:	199.49 +/-	PDD/DA/Other:	N/A
Existing Zoning:	CD-2.5/ ETJ	Proposed Zoning:	Light Industrial
Existing Use:	Vacant/Residential	Proposed Use:	Data Center
Existing Occupancy:	Restrictions do apply in CD 2.5 zoning, but they do not apply in the land currently in the ETJ.	Occupancy:	Restrictions Do Not Apply
Preferred Scenario:	Conservation/Cluster	Proposed Designation:	Commercial/Employment Low
CONA Neighborhood:	N/A	Sector:	N/A
Utility Capacity:	Available (no data available for water and electricity as these will not be provided by the City of San Marcos)	Floodplain:	No
Historic Designation:	N/A	My Historic SMTX Resources Survey	No There is an existing cemetery within the boundary of the site, however the cemetery is not included within this request.

Discussion Topics:

Water/Energy Use Commissioner Garber noted that large data centers could use up to 100 Megawatts of power, which was the same as 80,000 households and so the data center could potentially consume double the amount of all City of San Marcos households. He also noted that per the Department of Energy 1% of all global electricity is consumed by data centers, and in 2023 data centers used 74 Gigawatts, which was a 55% increase from the previous year, so the consumption of electricity from data centers was increasing. Regarding water use, he also noted that it was not known how often the water would need to be changed. Commissioner Spell stated that he could not see a way to make the project acceptable, however maybe Council could find a way to “thread the needle” by requiring the development to use purple pipe.

Noise – Commissioner Garber stated that the average noise level in server areas was 92 decibels and 96 decibels in the server racks, compared to a heavy metal concert which is between 80-120 decibels, and cited a study which said the hum from data centers could be heard from up to 2 and a half miles away, and continued exposure to a low level hum could disrupt sleep and possibly cattle. He also noted that noise from the data center could negatively impact visitors to the cemetery.

Change to Comprehensive Plan so soon after adoption Commissioner Garber noted that there had been 2 requests to change the Comprehensive Plan since it was adopted, and that the community had specifically designated the Conservation/Cluster areas in order to limit growth in those areas of the City over the life of the comprehensive plan, and if the city continues to make changes then what was the point of the plan. Commissioner Agnew remarked that the site should probably have been designated as “Neighborhood Low” in the Preferred Scenario map due to the existing CD 2.5 zoning.

Restrictive Covenants/ Potential Postponement The applicant requested to postpone the item in order to draft restrictive covenants for consideration by the Planning and Zoning Commission. A motion to postpone the item to a further meeting failed 7-2.

Impact on Cemetery Commissioner Garber asked who owned the cemetery and had they been notified. Staff responded that appraisal district considered the cemetery and the applicant site as part of one site and so they would not have been notified per code. Staff also noted that the 1912 deed to the property specifically excluded the cemetery site and that the cemetery was reserved for descendants of those 1912 property owners.

Impact of Federal Policy/ Demand for Data Centers – Commissioner Spell referenced the August 2022 CHIPS Act from the Biden administration, which aimed to increase semiconductor production in the United States for the purpose of having more data centers in the United States in order to compete with China.

Development within the City Limits vs Outside –Chair Case stated that it would be preferable to have the development in the City limits as opposed to outside, as the City would have control over the regulations.

Preferred Scenario Map Amendment Request PSA-25-01

904 Francis Harris Lane

Conservation/Cluster to
Commercial/ Employment Low

History

This request for a Preferred Scenario Amendment from Conservation/ Cluster to Commercial/Employment Low covers 199.49 acres of land on the western side of Francis Harris Lane and is accompanied by the following applications:

- ZC-25-02 - Zoning change from Character District 2.5 (CD 2.5) and Future Development (FD) to Light Industrial (LI)
- AN-25-02 - Annexation request for the southwestern part of the site located outside of the city limits (approx. 64 acres).

The applicant is requesting the Preferred Scenario Amendment and associated zoning change in order to construct a data center. Data centers are considered a Light Industrial use and so would only be permitted under either Light Industrial or Heavy Industrial zoning. No proposed site plans have been received at this time.

The northeastern 137-acre tract that is currently within the city limits was annexed and zoned to CD 2.5 on August 2nd, 2022 (Ord. 2022-45). CD2.5 zoning predominantly allows single family residential development. Due to concerns regarding the proposed residential use adjacent the Hays Energy Power Plant located on the other side of Francis Harris Lane, Council requested that a restrictive covenant (Hays County Clerk Inst. 22049761) be placed on the site which would require the developer to notify potential residents on the site of the adjacent power plant and potential noise/industrial lighting impacts, as well as additional construction requirements for all homes within 1,500 ft of the power plant.

Additional Analysis

Page 110 of the adopted Vision SMTX Comprehensive Plan states that the existing "Conservation/Cluster Place Type "identifies areas where development would be discouraged over the life of the Comprehensive Plan" and that " Development that does occur within conservation and reserve areas should be low impact to the natural environment by using a variety of development techniques and strategies". Conversely, the requested Commercial/Employment Low would "facilitate lower density, auto-oriented retail, office and industrial type uses" (Vision SMTX Comprehensive Plan, p102).

Staff's recommendation for approval is based on the analysis that commercial/industrial uses are preferable to a new residential subdivision adjacent to the existing power plant, which is permitted by right under the current zoning for most of the site.

Comments from Other Departments

Police	No Comment
Fire	No Comment
Public Services	No Comment
Engineering	No Comment
Economic Development	The proposed use is a target industry under the Economic Development Policy identified as a desirable industry for the City of San Marcos. Target industry: Information Technology.
