

Naming Recommendation For the Existing Wastewater Treatment Plant

Recommended Name: River Road Water Reclamation Facility

Statement of Appropriateness: Utilizes the closest major public road for the location identifier, which is River Road. Utilizes, “water reclamation facility,” as the facility descriptor due to the wastewater treatment plant’s Type 1 reuse authorization from TCEQ and its production of reclaimed water to offset potable water usage in the city.

Cost to Implement Name: The cost to implement is less than \$5,000 due to the minimal amount of signage that needs replacement (aluminum signs on facility fence/gate). This will be funded under the operations budget.

Council Action Request: Approve the recommended name, River Road Water Reclamation Facility.
