

**BRYAN FIRE DEPARTMENT**  
"DEDICATED PROFESSIONALS PROTECTING YOUR LIFE AND PROPERTY"

May 12, 2015

Les Stephens  
Fire Chief  
San Marcos, TX

In reference to your questions about BRW Architects, Bryan Fire Department has used BRW twice in the past. They were the architects for our Station 5 which was completed early 2009 and also for a site study in 2012 for our new Station 2. Currently, they were chosen as the design architects on our Station 2 with construction starting later this year.

We have been very pleased with BRW along their concepts and designs. They are easy to work with and respond quickly to any issues with the construction aspect. Because they have built so many fire stations, they bring a wealth of knowledge on what works or doesn't during the design phase. We believe with their extensive back ground in fire station design and project management, they bring the experience to the table to see a project to its completion that's in the best interest for the City. Our sister city (College Station) must believe it too, since they have built three new stations and one remodel using BRW each time.

Sincerely,

Randy McGregor  
Fire Chief
