Transportation Master Plan

- The proposed roadway is a planned Avenue on the City's Thoroughfare Plan
- As properties develop this road could connect to SH 80 and provide an alternate route for travelers on SH 80
- Final road alignment east of FM 1984 will be determined as properties develop
- Property Owners may only construct roads and develop on land they own

AN-24-03

Axis Parkway - FM 1984

Thoroughfare Plan

Details

- Developer responsible for constructing Transportation Master Plan roadway (not financed by the City)
- Upon annexation, built to City Standards.
- Intended to accommodate truck traffic once Axis develops.
- Offers alternate route (to SH 80) for all drivers accessing FM 110.
- Staff currently reviewing Plat, Watershed Protection Plan, and Public Improvement Construction Plans which include the road and off-site utilities.

Additional Details

- Future development is subject to Development Agreement which requires compliance with City Standards and includes benefits such as:
 1. Reduction of impervious cover to 70% overall (vs. 80% in Code).
 2. Reduction of post-construction runoff by 10%.
 3. Prohibition of certain uses which would otherwise be allowed in Heavy Industrial or in the ETJ.
 - Development in the ETJ, without the Development Agreement would not be held to these higher standards.
- Roadway can be constructed in Caldwell County, following the County processes. A Municipal Utility District (MUD) is not required by the County.
- Prior financial analysis showed up to \$62 million in property tax revenue generated at full build out of the development.
(20 year projection based on average industrial property value and current tax rate)

Growth Projection

Assumptions:

- Year 1 – No Change
- Year 5 – 15% Build Out
- Year 10 – 50% Build Out
- Year 20 – 100% Build Out
- Based on average industrial property value per acre and five-year growth rate
- Current Tax Rate 60.30¢
- Adjusted for Martindale Agreement

This slide was prepared for and presented at the April 18, 2023 City Council Meeting

In addition to the property tax revenue shown in the chart above, other revenue sources generated by the development would be in the form of new jobs, increase in sales taxes, and service needs from existing businesses.
