Re: PSA 23-02, ZC 23-19, CUP 23-22, AC 23-09– Preferred Scenario Map Amendment, Rezoning, Conditional Use Permit and Alternative Compliance request applications for the approximately 2.557 acre property located at southeast corner of North and Lindsey Street in the City of San Marcos, Hays County, Texas (the “Property”)

Dear Ms. Hernandez:

As representatives of the owner of the Property, we respectfully submit the enclosed package that includes a Preferred Scenario Map Amendment Application, a Rezoning Application, a Conditional Use Permit Application for purpose-built student housing with a reduction in parking to 0.75 and an Alternative Compliance request to allow up to 7 stories. The Property consists of 2.557 acres and is located adjacent to Texas State University (the “University”) at the southeast corner of North Street and Lindsey Street in the City of San Marcos, Texas.

The purpose of these applications is to change the Preferred Scenario map for the Property from Existing Neighborhood to High Intensity per the currently adopted comprehensive plan or Neighborhood High per the proposed unadopted comprehensive plan. The Property is intended to be redeveloped with a student housing project. The Property is currently zoned multi-family and is surrounded by the University, other multi-family and sorority houses. The Property not adjacent to residential. Currently, 0.626 acres of the Property is zoned CD-5D. We are requesting that the remaining 1.931 acres of property be rezoned to CD-5D to have consistent zoning on all lots to accommodate a student housing project.

We believe that this location is ideal to accommodate the increased student population, and the need for student housing adjacent to the University. Therefore, we are requesting a CUP for purpose-built student housing and a reduction in parking spaces as part of the CUP. We recognize that most students will bring a car to campus, therefore we are proposing a parking

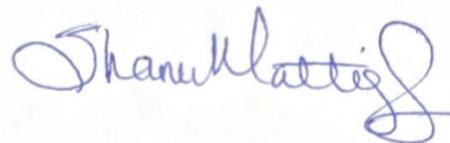

structure to accommodate the vehicles of the students. We commissioned a student housing evaluation to determine the parking utilization rates at comparable student housing properties located within one mile of the site. Our survey covered 10 properties that contained a total of 4,302 beds in 1,730 units. At these 10 properties, there are 3,230 parking spaces available to students. The average number of spaces per bed is 0.75 and the average vacancy rate is 10%, however, the majority of the vacant spaces are at the two most “overparked” projects, Sanctuary Lofts and Vie Lofts. Based on the current occupancy rates, the current ratio of spaces leased per leased bed is 0.69. Our project is proposing a parking ratio of 0.75, which has been determined to be more than we need to accommodate the project as a whole. The City’s recently adopted city-wide booting ordinance will also help to discourage students to park within the neighborhoods and the new proposed transit routes should also help to decrease traffic by allowing students an alternative to driving to get to areas outside of downtown. The adjacency to the University is an ideal location for this product type allowing students to walk across the street and be on campus.

We are also requesting an alternative compliance to increase the height of the project from 5 to 7 stories. This project is outside of the downtown area immediately adjacent to the University. We have provided a 3D rendering to show the height of the building as it related to surrounding properties. In order to serve the needs of the University student population given the limited number of sites that exist that are across from the University and not adjacent to single family, an increase in height is necessary to get the density to make the project beneficial for all.

This project is ideal, due to its location adjacent to campus, its proximity to services within the downtown area that are walkable. It will include an improved pedestrian experience with a well-connected network of streets to accommodate the increased walkability of students without the need to drive to class or to access their cars for work or to shop or access other services.

Please let me know if you or your team members require additional information or have any questions. Thank you for your time and attention to this project.

Very truly yours,

Shannon Mattingly

Re: San Marcos Student Housing Market Research and Parking Utilization Study

Dear Mr. Kenyon:

As you requested, we have just completed a student housing evaluation to determine the parking utilization rates at comparable student properties located within one mile of the site where you would like to build, at 420 North Street, in downtown San Marcos, Texas. Our survey covered 10 properties that contain a total of 4,301 beds in 1,730 units. At these 10 properties, there are 3,230 parking spaces available for students to lease (Table 1). The average number of spaces per bed is 0.75 and the average vacancy rate is 10%, but a majority of the vacant spaces are at the two most "overparked" projects, Sanctuary Lofts and Vie Lofts (Table 2). Based on the current occupancy rates, the current ratio of spaces leased per leased bed is 0.69 (Table 3).

Based on this analysis, Capitol Market Research suggests a parking ratio of 0.70 spaces per bed at the subject property. After you have reviewed the report and our recommendation, we invite you to call with any questions or comments that you may have.

Respectfully submitted,

CAPITOL MARKET RESEARCH

**FIELD NOTES FOR
0.4735 ACRES OF LAND**

A tract of land containing 0.4735 acres out of Lots 1, 2 & 3, Block 2 of the P. C. Woods Addition to the City of San Marcos, a subdivision in Hays County, Texas as described in Volume T, Page 80, Hays County Deed Records, and being the same tract conveyed to W. C. Carson by Sunset Limited as recorded in Volume 252, Page 473, Hays County Deed Records, and being more particularly described by metes and bounds as follows:

BEGINNING at an iron pin with a Pro-Tech cap found for the northeast corner of the herein described tract, and also being the northeast corner of Lot 1, Block 2, of the P. C. Woods Addition, and located at the intersection of the southeast ROW of Lindsey Street and the southwest ROW of Comanche Street;

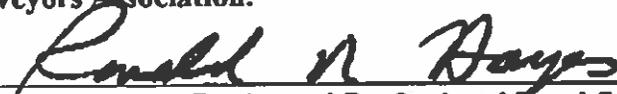

THENCE S 08° 00' 00" E, following the Comanche ROW, a distance of 83.36 feet to an iron pipe found for the southeast corner of this tract;

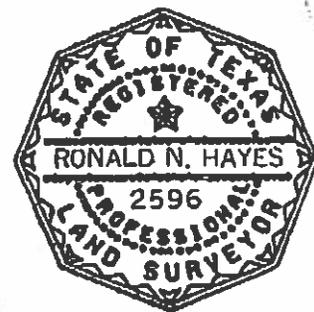

THENCE S 81° 28' 23" W, leaving the Comanche ROW, a distance of 246.48 feet to an iron pin found at the base of a concrete retaining wall for the southwest corner of this tract, and at 241.48 feet passing the east line of a 5' sewer easement of record in Volume 103, Page 384, Hays County Deed Records;

THENCE N 09° 00' 10" W, following the west line of the 5' sewer easement, a distance of 83.50 feet to an iron pipe found in concrete, located in the southeast ROW of Lindsey Street for the northwest corner of this tract and the northwest corner of Lot 3, Block 2, of the P. C. Woods Addition;

THENCE N 81° 30' 20" E, a distance of 247.94 feet to the **POINT OF BEGINNING**, containing 0.4735 acres.

This is to certify that this description of land represents an actual survey made by me on the ground under my supervision as shown on the accompanying plat and qualifies as a Category 1A, Condition 2 survey of the latest standards and specifications of the Texas Surveyors Association.

Re: Updated PSA 23-02, ZC 23-19, CUP 23-22, AC 23-09– Preferred Scenario Map Amendment, Rezoning, Conditional Use Permit and Alternative Compliance request applications for the approximately 2.823-acre property located at the southeast corner of North and Lindsey Streets in the City of San Marcos, Hays County, Texas (the “Property”)

Dear Ms. Hernandez:

As representatives of the owner of the Property, we respectfully submit the enclosed package that includes no updates to the Preferred Scenario Map Amendment Application or the Rezoning Application. There are, however, amendments to the Conditional Use Permit Application for purpose-built student housing with a reduction in parking to 0.75. The developer will also provide 20 additional covered garage public parking spaces at the developer’s expense, (\$25K/space * 20 spaces = \$500,000) and will comply with the parking reduction fee identified in Division 2, Section 7.1.2.1,E,2 of the Land Development Code. The Alternative Compliance request has been amended to allow for up to 7 stories on the east side of North Street, however based on concerns from the neighbors, Planning Commission and City Council we have taken their suggestion and reduced the height on the west side to 5 stories, which will match what is allowed in CD-5D and is only 10-12 feet higher than what is currently allowed by right.

The purpose of these applications is to change the Preferred Scenario map for the Property from Existing Neighborhood to High Intensity per the currently adopted comprehensive plan or Neighborhood High per the proposed unadopted comprehensive plan. It is important to note that the proposed plan shows Neighborhood High on either side of our property and we would propose changing our property to be consistent with the surrounding properties in the new plan. The Property is intended to be redeveloped as a student housing project. The Property is currently zoned multi-family and is surrounded by the University, other multi-family and sorority houses. The Sanctuary Lofts and Vistas of San Marcos properties have been recently bought by Texas State University and will remove 1081 beds from non-University Housing availability. The Property is not adjacent to residential. Currently, a portion of the Property is

Documents Provided by Developer

zoned CD-5D. We are requesting that the remaining parcels identified be rezoned to CD-5D to have consistent zoning on all lots to accommodate a student housing project. It is important to note these properties are already entitled and can develop as multi-family projects by right.

We believe that this location is ideal to accommodate the increased student population, and the need for student housing adjacent to the University. By allowing more dense student housing at key locations, such as this, the city is helping solve many of the most commonly heard issues in the community such as: Avoiding “student sprawl” throughout the city and removing many cars and busses required for the daily commute to the University, therefore reducing traffic congestion and pollution. We are requesting a CUP for purpose-built student housing and a reduction in parking spaces as part of the CUP. We recognize that many students will bring a car to campus, therefore we are proposing a parking structure to accommodate the vehicles of the students. We commissioned an independent third-party parking study to determine the parking utilization rates at comparable student housing properties located within one mile of the site, and within walking distance to the University. Our survey covered 10 properties that contained a total of 4,302 beds in 1,730 units. At these 10 properties, there are 3,230 parking spaces available to students. The average number of spaces per bed is 0.70 and the average vacancy rate is 10%, however, the majority of the vacant spaces are at the two most “overparked” projects, Sanctuary Lofts and Vie Lofts. Based on the current occupancy rates, the current ratio of spaces leased per leased bed is 0.69. Our project is proposing a parking ratio of 0.75, plus 20 public parking spaces, which has been determined to be more than we need to accommodate the project as a whole. The City’s recently adopted city-wide booting ordinance will also help to discourage students from parking within the neighborhoods, and the new proposed transit routes will help to decrease traffic by allowing students an alternative to driving to get to areas outside of downtown. The adjacency to the University is an ideal location for this product type allowing students to walk across the street and be on campus. The project will accommodate 20 covered public parking spaces and additional indoor secured bike parking. In addition, the developer will provide bikes that can be checked out at no charge at any time to get around campus, thereby further reducing traffic concerns in the area. The Developer will also have a bike maintenance and repair shop on site.

We are also requesting an alternative compliance to increase the height of the project from 5 to 7 stories, only on the east side of North Street. This will allow a nice reduction in density from 7 stories on the East side of North Street to 5 stories for the building fronting directly on North Street to the west. The reduction in height will continue to the west to existing 3 story apartment project, and then on to 2 story single family homes.

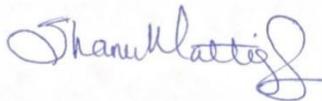

This project is outside of the downtown area immediately adjacent to the University. We have provided a 3D rendering to show the height of the building as it relates to surrounding properties. In order to serve the needs of the University’s student population and given the very limited number of sites that exist across from the University and not adjacent to single family, an increase in height is necessary to achieve the density to make the project beneficial for all. We have met with the Fire Chief and Fire Marshall and incorporated all of their recommendations to improve fire access to the site. We will be removing two older complexes as part of this project development, which were not required at the time of construction to meet the same current fire standards that exist today and are not currently sprinkled. Our proposal will include the first two stories be built with concrete and will then transition to wood construction.

This project is ideal, due to its proximity to the University as well as stores and services within the downtown area that are walkable. It will include an improved pedestrian experience with a well-connected network of streets to accommodate the increased pedestrian traffic, while reducing the number of cars on the road. Students will be able to attend class, get to work, shop or access other commonly used student services, all without accessing their cars.

After going through the first round of public input the developer has addressed the comments from the neighborhood meeting and has also addressed the criteria for requesting alternative compliance. These comments are attached on the following tables, as well as some additional renderings and an updated property summary.

Please let me know if you or your team members require additional information or have any questions. Thank you for your time and attention to this project.

Very truly yours,

A handwritten signature in blue ink that reads "Shannon Mattingly". The signature is written in a cursive style with a large, stylized initial "S".

Shannon Mattingly

Issue Identified	Project Response
Safety of student housing (structure)	Less safe, non-sprinkled units will be replaced with new, sprinkled units that meet current Building, Fire, Electrical, and Plumbing Codes. Met with the Fire Chief and Fire Marshall to discuss improved access to the site based on their recommendations.
Rent by the bed student housing contracts.	Individual housing contracts allow roommate matching. Students will only be placed with other students of the same gender. Lighting and access/egress will be designed to current Code standards and provide a safer environment than exists today. Rent by the bed protects students by

making them responsible for only their payments and damages. They are not responsible as they would be in traditional apartments, for roommates moving out. Places risk on the developer. If a certain roommate leaves before the lease is over, or causes damage to their room, the other(s) do not become responsible for that student's payments, the loss is on the developer for the damage and loss of rent if they cannot release the bedroom.

Overbuilt student housing

Data shows there is a current (and rising) demand for student housing, even with the proposed Texas State University project. In an independent study done by Capital Market Research, it found that the current

occupancy rates are at 97% in student housing projects city-wide, and showing a current need for over 3,000 student housing beds. As of this week it has been brought to our attention that the University has purchased Sanctuary Lofts and the Vistas properties.

Parking

An independent parking study, as suggested by the city was conducted in 2023 and clearly identifies 0.7 as the appropriate ratio of parking spaces/beds. We are proposing to park our development at .75. An additional 20 spaces will be available for public parking and to help assist with commuter parking during school hours by allowing them off street parking. At over

	<p>\$25,000/parking space this will result in over a \$500,000 additional expense to the developer.</p>
Height	<p>While originally proposed to be all 7 stories, western 3 parcel heights have been reduced to 5 stories, as suggested.</p>
Flooding/Drainage	<p>Per the city planning and engineering departments this will all be addressed and enforced by the city code during the site development permitting process. It is important to note that the parking garage facility will utilize the current slope of the property but will not require further excavation.</p>

Historic Structures

We are currently in negotiations to have all 3 homes moved, if for some reason any or all of these falls through, we will immediately pursue moving the homes under the historic preservation guidelines.

Encroachment into Neighborhood

The height of the western 3 parcels has been reduced to 5 stories. Requested Preferred Scenario Amendment and Zoning Request are consistent with gradually decreasing density from the downtown area as noted above. The transition would go from 7 to 5 to 3. Noting that the current multifamily zoning allows for 4 stories by right and the current CD-5D allows for 5 by right.

Texas State University purchases downtown apartments for \$151 million

By Sierra Martin | 1:44 PM Feb 12, 2024 CST
Updated 1:44 PM Feb 12, 2024 CST

Texas State University has purchased two apartment buildings in downtown San Marcos to house an additional 1,086 students.

The Vistas and Sanctuary Lofts were acquired by TXST in December, and the university took over management of the properties in January. The \$151 million purchase of the two properties was cheaper per-square-foot than building new dormitories, according to Bill Mattera, executive director of housing and residential life at TXST.

"The goal is just to offer more affordable housing for students and really lower the rates of these properties," Mattera said.

The big picture

He said that the growth of the freshman class over the past few years has caused a shortage in campus housing.

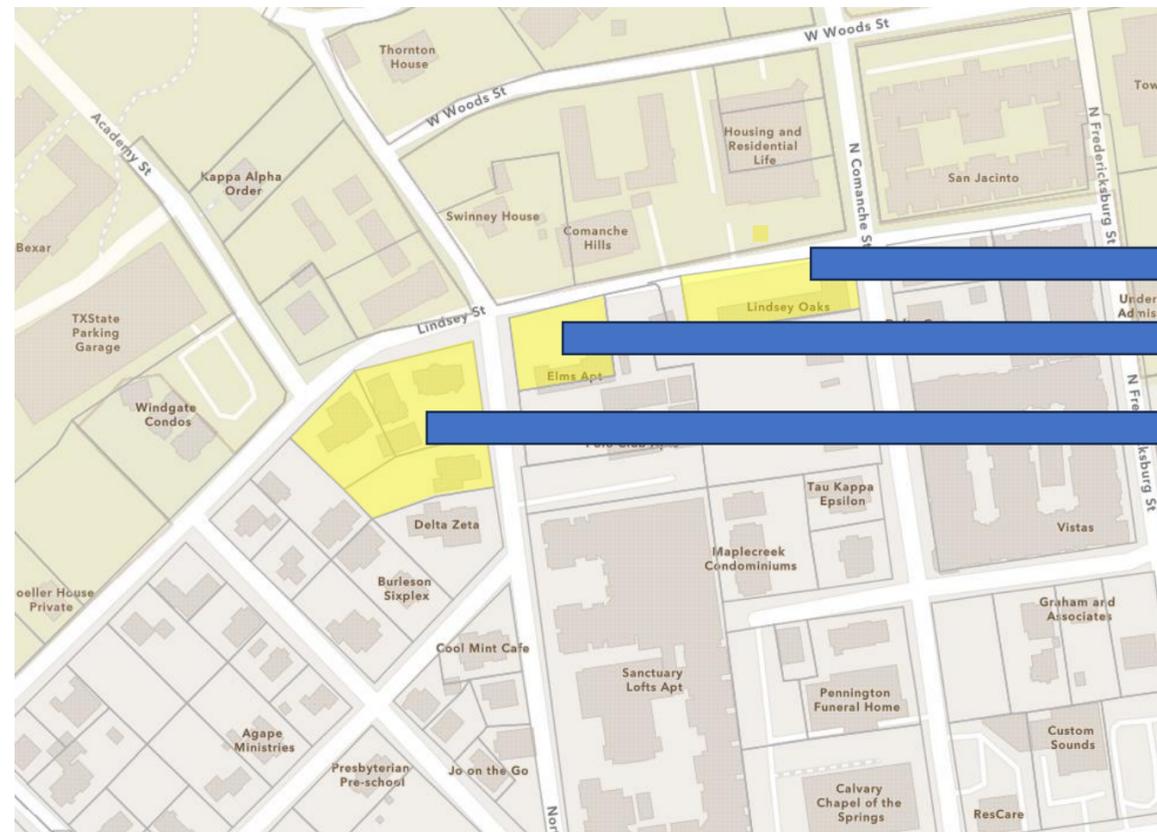

"Rents have increased by 40% in the San Marcos market, [TXST] has increased by 11%," Mattera said. "And so it's an opportunity to set up some affordable housing close to campus, but of the apartment variety."

About 90% of the property is already occupied by TXST students, but any occupant of *The Vistas* or *Sanctuary Lofts* that is not currently a student will be able to stay until the end of their lease but not have the ability to renew.

Request

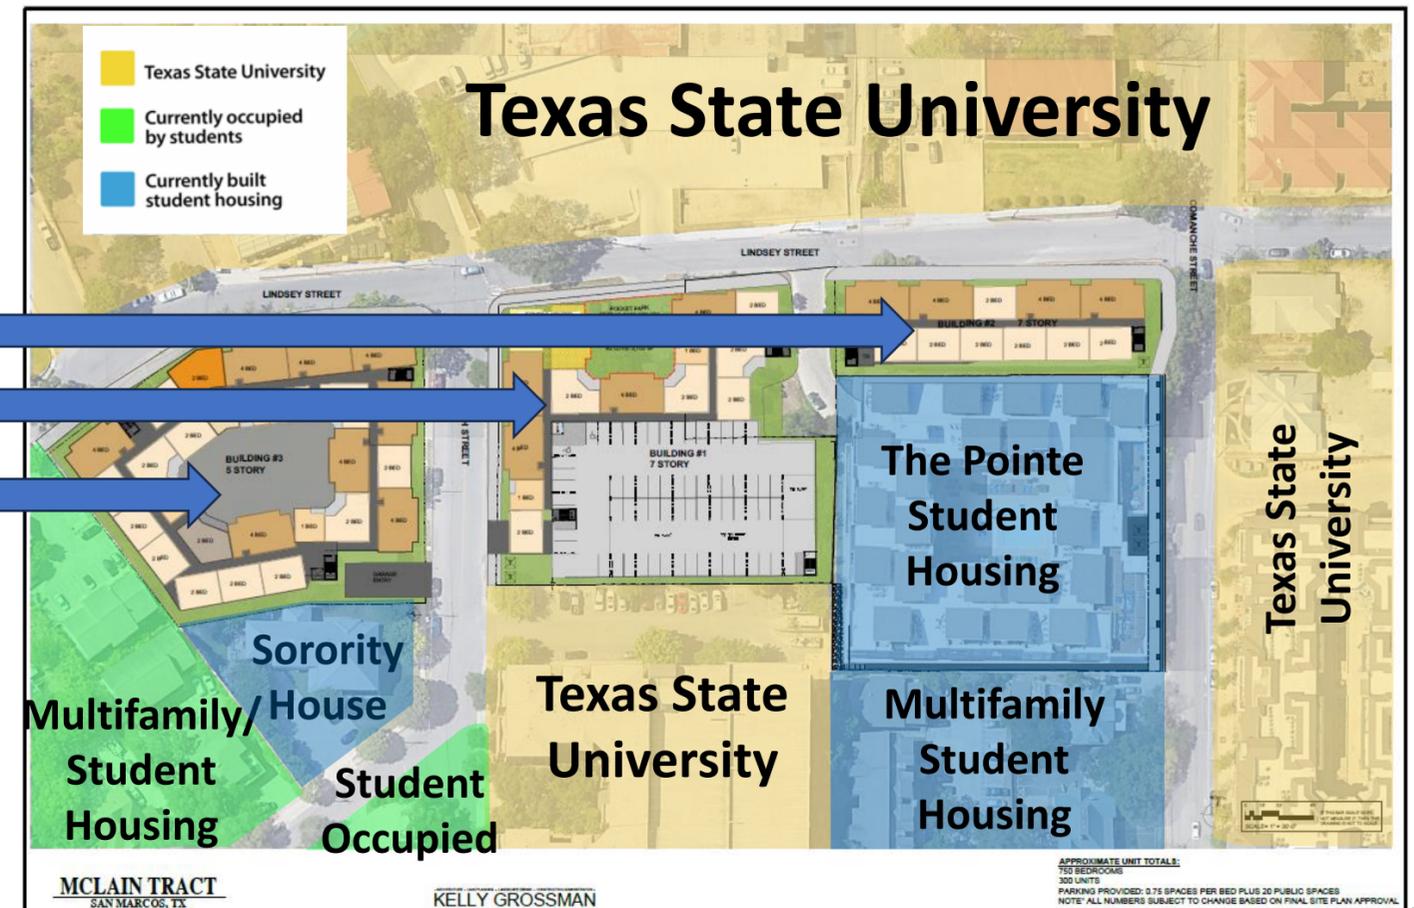

Rezoning Request:

- ZC 23-19
- 5 parcels
- From “Multifamily MF-12/MF-18/MF-24” to “Character District 5-D”
- Tract Size: 1.97 acres

Case Summary:

- **Staff Recommendation: Approval as Submitted**
- Application is submitted in conjunction with:
 - PSA 23-02
 - CUP 23-22
 - AC 23-09

Public Outreach and Participation

- Public Outreach Highlights

- Neighborhood Meetings were held on September 28, 2023 and January 31, 2024.
- Planning Commission hearing will be held on February 27, 2024
- Canvassing students on campus and non-students off campus in the downtown area

Issue Identified	Project Response
Safety of student housing (structure)	Less safe, non-sprinkled units will be replaced with new, sprinkled units that meet current Building, Fire, Electrical, and Plumbing Codes.
Safety of student housing (rent by bed)	Individual housing contracts allow roommate matching. Students will only be placed with other students. Lighting and access/egress will be designed to current Code standards and provide a safer environment than exists today
Overbuilt student housing	Data shows there is a current (and rising) demand for student housing, even with proposed Texas State University project. University is currently purchasing existing student housing projects to support the need.
Parking	Parking study conducted in 2023 clearly identifies 0.7 as the appropriate ratio of parking spaces/beds. This project will park at .75 and will pay the mandated parking fee prescribed by Code. An additional 20 spaces will be available for public parking.
Height	While originally proposed to be all 7 stories, western 3 parcel heights have been reduced to 5 stories.
Flooding/Drainage	Impervious cover of eastern 3 parcels is almost 100%. Per Engineering Department, impervious cover on eastern 3 parcels will be addressed as part of Site Development Permit.
Historic Structures	Historic structures will not be demolished, they will be relocated.
Encroachment into Neighborhood	The height of the western 3 parcels has been reduced to 5 stories. Requested Preferred Scenario Amendment and Zoning Request are consistent with gradually decreasing density from downtown area.

Petitions & Letters of Support (1200 Signatures in Support)

427 Lindsey Street Partnership, Ltd

1407 Brown Street, San Marcos, Texas 78666

Dear Members of City Council and/or Planning and Zoning Commission

I represent the owner of 427 & 431 Lindsey Street and 410 & 412 Burleson Street, San Marcos, TX 78666.

These properties connect from Lindsey Street on the north all the way to Burleson Street on the south and are directly adjoined to 413 & 421 Lindsey Street and 415 & 409 North Street making my property directly contiguous to the west of the new student housing project that Kenyon Companies is proposing on the corner of North Street and Lindsey Street.

The four properties owned by 427 Lindsey Street Partnership are multifamily/student housing and have been rented almost exclusively to students for many years.

I have been in contact with Kenyon Companies, and I am in support of the four (4) applications being submitted for these properties to enable them to be used as student housing. This includes the Preferred Scenario Amendment, the Zoning change to CD-5D, the Conditional Use for Student Housing, and the Alternative Compliance for an increase in height to 7 stories.

With such proximity to Campus, minimal site constraints, and a need for student housing near Campus, a project like this will benefit both the University and the City of San Marcos by:

- Enabling students to live closer to campus, which will remove traffic from other housing farther off Campus;
- Reducing the sprawl effect that can come with increased enrollment at Texas State
- Reducing vehicular traffic congestion, enabling them to access Campus and other routine services by bicycle or walking.

Thank you for considering this request.

Sincerely,

Allen E. Wise
President/Manager
Date: 10/20/23

PETITION OF SUPPORT

Preferred Scenario Amendment: PSA 23-02: From "Existing Neighborhood" to "High Density-Downtown" for Site 1
Rezoning Request: ZC 23-19: From "Multifamily MF-12/MF'18" to "Character District 5-D"
Conditional Use Permit: CUP 23-22: For Student Housing & Reduction in Parking to 0.75
Alternative Compliance Request: AC 23-09: Increase the permitted height from 5 to 7 stories

Project Description: The purpose of these applications is to change the Preferred Scenario map for both Sites from Existing Neighborhood to High Intensity-Downtown per the currently adopted Comprehensive Plan. **The Property is intended to be redeveloped with a student housing project with up to 917 beds.** The Property is currently zoned multi-family and is surrounded by the University, other multi-family and sorority houses. **The Property is not adjacent to residential.**

We believe that this location is ideal to accommodate the increased student population, and the need for student housing adjacent to the University. We recognize that most students will bring a car to campus, therefore we are proposing a parking structure to accommodate the vehicles of the students. Our project is proposing a parking ratio of 0.75, which has been determined to be more than we need to accommodate the project as a whole. **The adjacency to the University is an ideal location for this product type allowing students to walk across the street and be on campus.**

We are also requesting an alternative compliance to increase the height of the project from 5 to 7 stories. **This project is outside of the downtown area immediately adjacent to the University.** We have provided a 3D rendering to show the height of the building as it related to surrounding properties. **In order to serve the needs of the University student population given the limited number of sites that exist that are across from the University and not adjacent to single family, an increase in height is necessary to get the density to make the project beneficial for all.**

Zoning Change Request

ZONING REGULATIONS

CHAPTER 4

Section 4.1.2.6 Character Districts

- A. Character districts are intended for infill development and new development in both high and medium intensity zones on the Preferred Scenario Map.
- B. Character districts provide for higher density residential and commercial uses in well planned areas where utilities and infrastructure are designed and constructed to support intense development in a walkable and mixed use environment.

TABLE 4.5 CHARACTER DISTRICTS

ABBREVIATED DESIGNATION	DISTRICT NAME	DISTRICT INTENT	SEC.
CD-5D	Character District -5 Downtown	The CD-5D district is intended to provide for mixed use, pedestrian-oriented development in downtown. To promote walkability and to encourage street level retail activity, auto-oriented uses are restricted. CD-5D should be applied in areas where the existing or proposed land use pattern promotes the highest levels of pedestrian and mixed use activity in the community.	Section 4.4.3.7

CHAPTER 4 ZONING REGULATIONS

GENERAL DESCRIPTION

The CD-5D district is intended to provide for mixed use, pedestrian oriented development in downtown. To promote walkability and to encourage street level retail activity, auto-oriented uses are restricted.

Walk Score is 93 for this site, which ranks among the highest in the nation for student housing near campus
 [Source: www.walkscore.com]

CHAPTER 4 ZONING REGULATIONS

APARTMENT:
 A multi-family residential only structure consisting of a number of dwelling units arranged side by side and stacked on multiple floors. Unit types may be either single level (flats) or multi-floor (townhouse).

Zoning Change Request

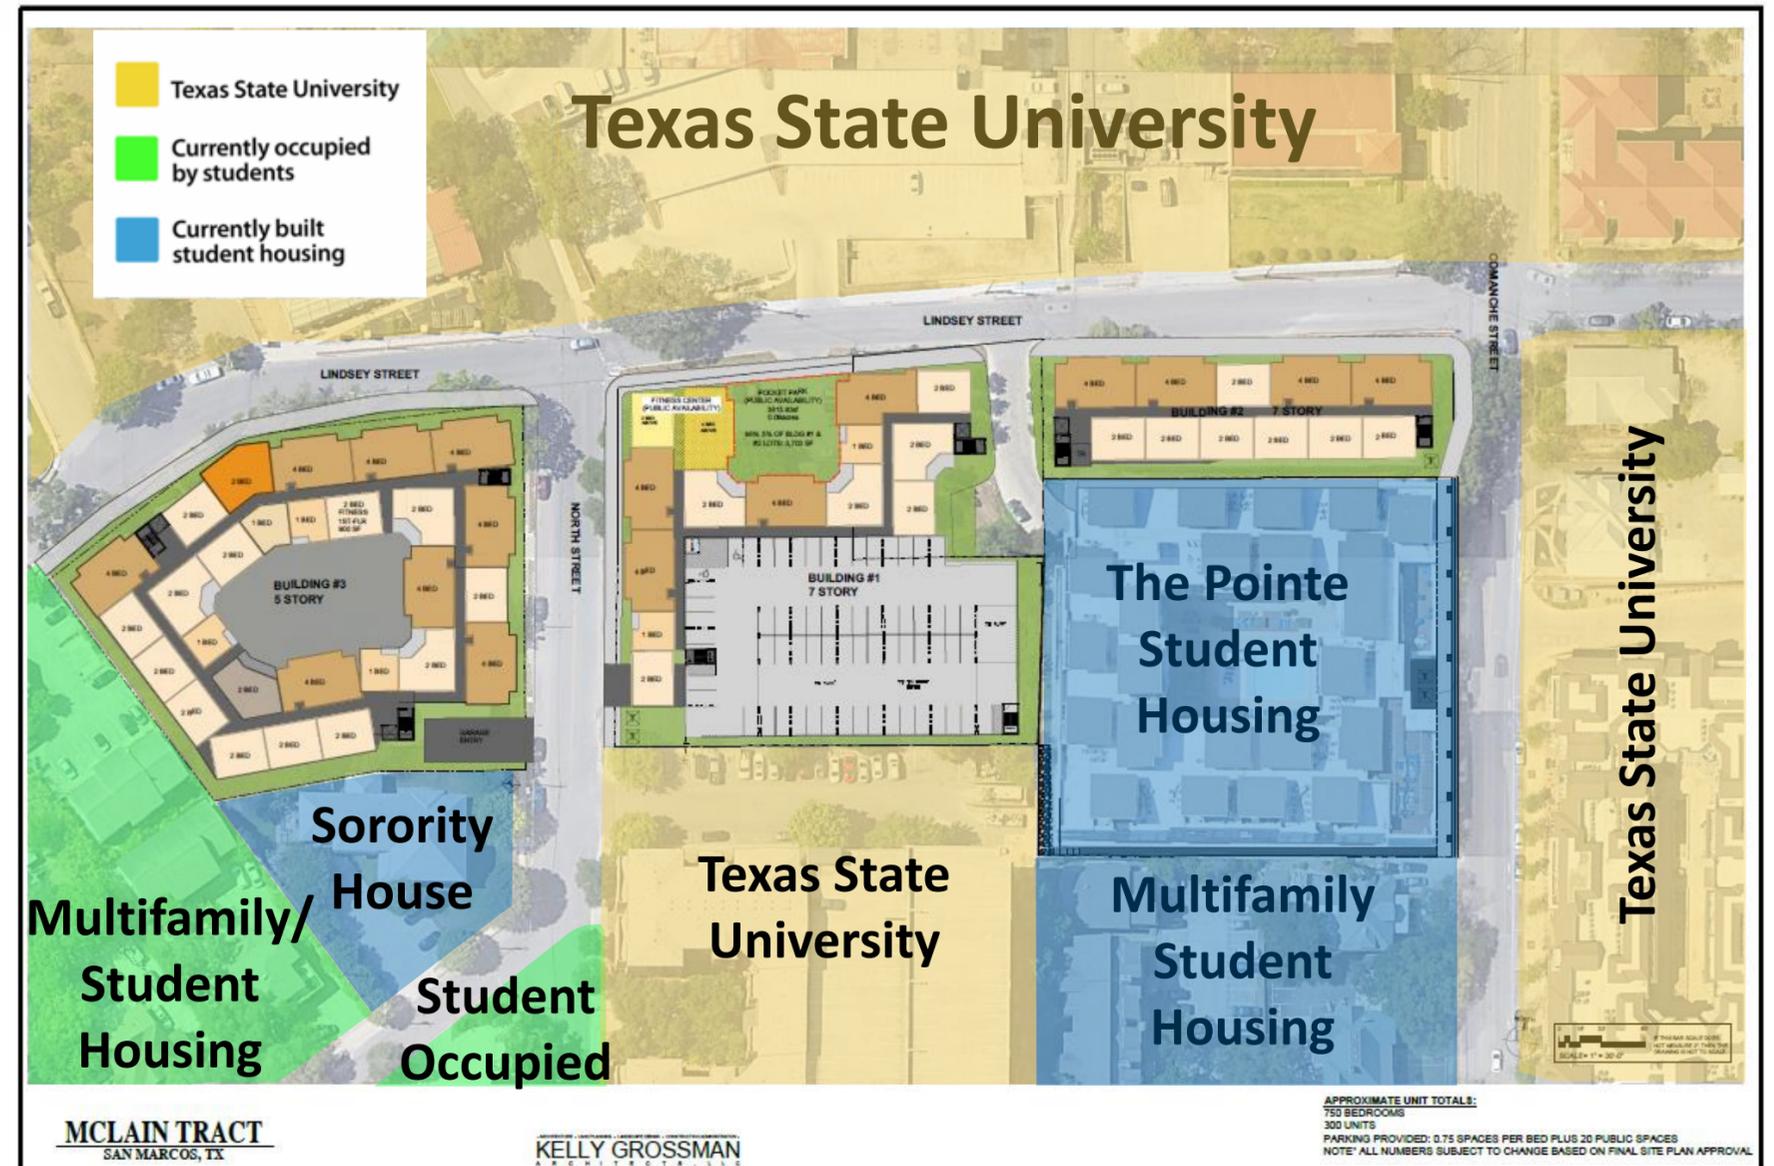

Parcel #	Label	Address	Zoning Change	Existing Zoning	New Zoning Allowed	Proposed
R34773	A	421 Lindsey St.	From MF-12 to CD-5D	4 stories	5 stories	5 stories
R141054	B	413 & 419 North St.	From MF-12 to CD-5D	4 stories	5 stories	5 stories
R133230	C	499 North St.	From MF-18 to CD-5D	4 stories	5 stories	5 stories
R32207	D	420 North St.	From MF-24 to CD-5D	4 stories	5 stories*	7 stories
R53147	E	435 N. Comanche St.	No Change (CD-5D)	5 stories*	5 stories*	7 stories
R155306	F	410 North St.	From MF-24 to CD-5D	4 stories	6 stories*	7 stories

* Alternative Compliance available (see Section 4.3.4.4 or Section 4.3.4.5).

Zoning Change Request - Summary

- Zoning change requested for 5 parcels.
- Property is currently zoned Multifamily.
- Project is seeking CD-5D
- Staff supports this request.
- Requested zoning:
 - Is consistent with surrounding zoning and use.
 - Promotes compatibility with adjacent and nearby uses.
 - Allows for a reasonable use of the property.
 - Satisfies a public need.
 - Promotes a transition between adjacent and nearby zoning districts, land uses, and development intensities.

Tax Impacts of Project

Tax Value Lost to Sale of Sanctuary Lofts/Vistas to Texas State University (2023)

Year	Taxing Unit	Tax Rate	Assessed Value		Lost Tax Value
			Sanctuary Lofts	Vistas	
2023	City of San Marcos	0.603000%	\$ 33,319,599	\$ 45,377,478	\$ 474,543
2023	Hays County	0.287500%	\$ 33,319,599	\$ 45,377,478	\$ 226,254
2023	San Marcos CISD	0.991500%	\$ 33,319,599	\$ 45,377,478	\$ 780,282
2023	Special Road District	0.020000%	\$ 33,319,599	\$ 45,377,478	\$ 15,739
2023					\$ 1,496,818

Tax Value Gained by McLain Project

Year	Taxing Unit	Tax Rate	Assessed Value						Lost Tax Value	Estimated Assessed Value - McLain	Gained Tax Value	Net Tax Value
			421 Lindsey	413/419 North	435 Comanche	410 North	420 North	409 North				
2023	City of San Marcos	0.603000%	\$ 248,140	\$ 968,915	\$ 1,431,612	\$ 244,720	\$ 665,000	\$ 579,110	\$ 24,949	\$ 65,262,107	\$ 393,531	\$ 368,581
2023	Hays County	0.287500%	\$ 248,140	\$ 968,915	\$ 1,431,612	\$ 244,720	\$ 665,000	\$ 579,110	\$ 11,895	\$ 65,262,107	\$ 187,629	\$ 175,733
2023	San Marcos CISD	0.991500%	\$ 248,140	\$ 968,915	\$ 1,431,612	\$ 244,720	\$ 665,000	\$ 579,110	\$ 41,023	\$ 65,262,107	\$ 647,074	\$ 606,051
2023	Special Road District	0.020000%	\$ 248,140	\$ 968,915	\$ 1,431,612	\$ 244,720	\$ 665,000	\$ 579,110	\$ 827	\$ 65,262,107	\$ 13,052	\$ 12,225
2023									\$ 78,695		\$ 1,241,285	\$ 1,162,590

The Estimated Assessed Value for McLain is a general estimate based on current building plans and market conditions and not a projection for the Tax Assessor's office.

- Project nets an approximate \$368,500 increase in City tax revenues over today's situation.
- This recovers 77% of tax revenues lost by sale of Sanctuary Lofts and The Vistas to Texas State University.
- All taxing units achieve 77% tax revenue recovery with project.

Changes Since Initial Application

The Applicant has undertaken the following in response to meetings with Staff and concerned citizens since 2021:

- **Studies:** Applicant has commissioned studies to make data-driven decisions on proposed rezoning:
 - *Student Housing Parking Utilization Study*, Capitol Market Research (July 2023)
 - *Apartment Community Survey*, Capitol Market Research (September 2023)
 - *San Marcos Student Housing Market Research and Demand Analysis*, Capitol Market Research (November 2023)
 - *McLain Traffic Analysis Letter*, Carlson, Brigance & Doering, Inc. (February 2024)

The Applicant has incorporated the following zoning-oriented changes and modifications in response to meetings with Staff and concerned citizens since 2021:

- **Height:** Applicant has reduced the height on the western parcels from 7 stories to 5 stories
- **Open Space:** Applicant has added public open space to project, including plaza/public seating
- **Commercial Space:** Applicant has added a publicly accessible gym to the ground floor

Summary

1. To mitigate and minimize Student Sprawl, there is NO BETTER place for this zoning than **ACROSS THE STREET FROM CAMPUS**
2. Staff fully supports Rezoning request
3. Proposed zoning is surrounded by multi-family, fraternity/sorority houses and University
4. There is a documented need for Student Housing (Texas State & Texas Higher Education Coordinating Board data)
5. The proposed zoning provides the density needed to accommodate this Student Housing use
6. Texas State just purchased The Vistas and Sanctuary Lofts to address this need, but additional units needed
7. Over **1200 students and non-students** have signed a petition in support of the Project, signifying support for this rezoning
8. The City will **replace approximately 77% of lost tax revenue** from that purchase through the zoning change
9. Project is consistent with City planning and zoning principles
10. Public Parking, Open Space, and Commercial Business space included in Project

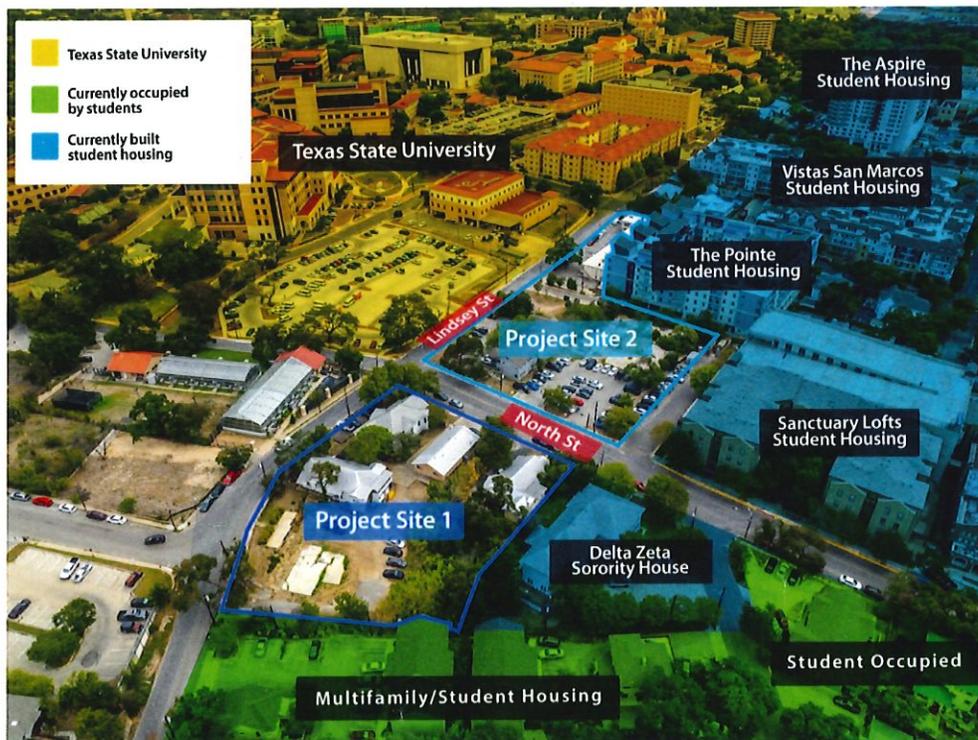

PETITION OF SUPPORT

Preferred Scenario Amendment: PSA 23-02: From “Existing Neighborhood” to “High Density-Downtown” for Site 1
Rezoning Request: ZC 23-19: From “Multifamily MF-12/MF’18” to “Character District 5-D”
Conditional Use Permit: CUP 23-22: For Student Housing & Reduction in Parking to 0.75
Alternative Compliance Request: AC 23-09: Increase the permitted height from 5 to 7 stories

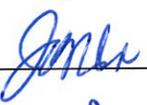

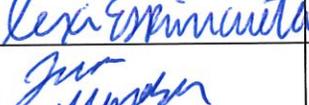

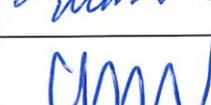

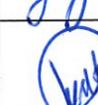

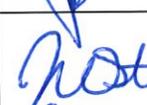

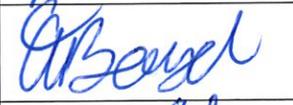

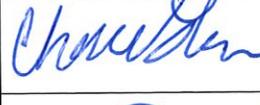

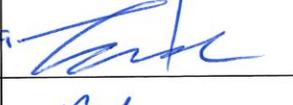

Project Description: The purpose of these applications is to change the Preferred Scenario map for both Sites from Existing Neighborhood to High Intensity-Downtown per the currently adopted Comprehensive Plan. **The Property is intended to be redeveloped with a student housing project with up to 917 beds.** The Property is currently zoned multi-family and is surrounded by the University, other multi-family and sorority houses. **The Property is not adjacent to residential.**

We believe that this location is ideal to accommodate the increased student population, and the need for student housing adjacent to the University. We recognize that most students will bring a car to campus, therefore we are proposing a parking structure to accommodate the vehicles of the students. Our project is proposing a parking ratio of 0.75, which has been determined to be more than we need to accommodate the project as a whole. **The adjacency to the University is an ideal location for this product type allowing students to walk across the street and be on campus.**

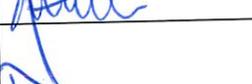

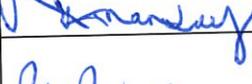

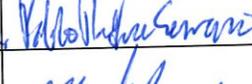

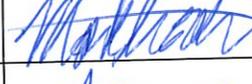

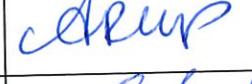

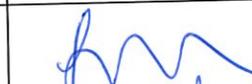

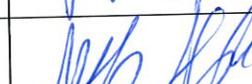

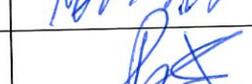

We are also requesting an alternative compliance to **increase the height of the project from 5 to 7 stories.** **This project is outside of the downtown area immediately adjacent to the University.** We have provided a 3D rendering to show the height of the building as it related to surrounding properties. **In order to serve the needs of the University student population given the limited number of sites that exist that are across from the University and not adjacent to single family, an increase in height is necessary to get the density to make the project beneficial for all.**

Re: PSA 23-02, ZC 23-19, CUP 23-22, AC 23-09 – Preferred Scenario Map Amendment, Rezoning, Conditional Use Permit and Alternative Compliance request applications for the approximately 2.557-acre property located at the corner of North and Lindsey Street in the City of San Marcos, Hays County, Texas (the “Property”)

Dear Mayor and City Council:

We represent The McLain Student and Conventional Housing project and would like to provide some additional information for your consideration as you prepare and review for our upcoming Preferred Scenario Amendment and associated cases. As you are aware we have submitted a Preferred Scenario Map Amendment Application, a Rezoning Application, a Conditional Use Permit Application for purpose-built student housing (Modified to the east side only) and an Alternative Compliance request to allow up to 7 stories (modified to the east side only). The Property consists of 2.557 acres and is located adjacent to Texas State University (the “University”) at the corner of North Street and Lindsey Street in the City of San Marcos, Texas.

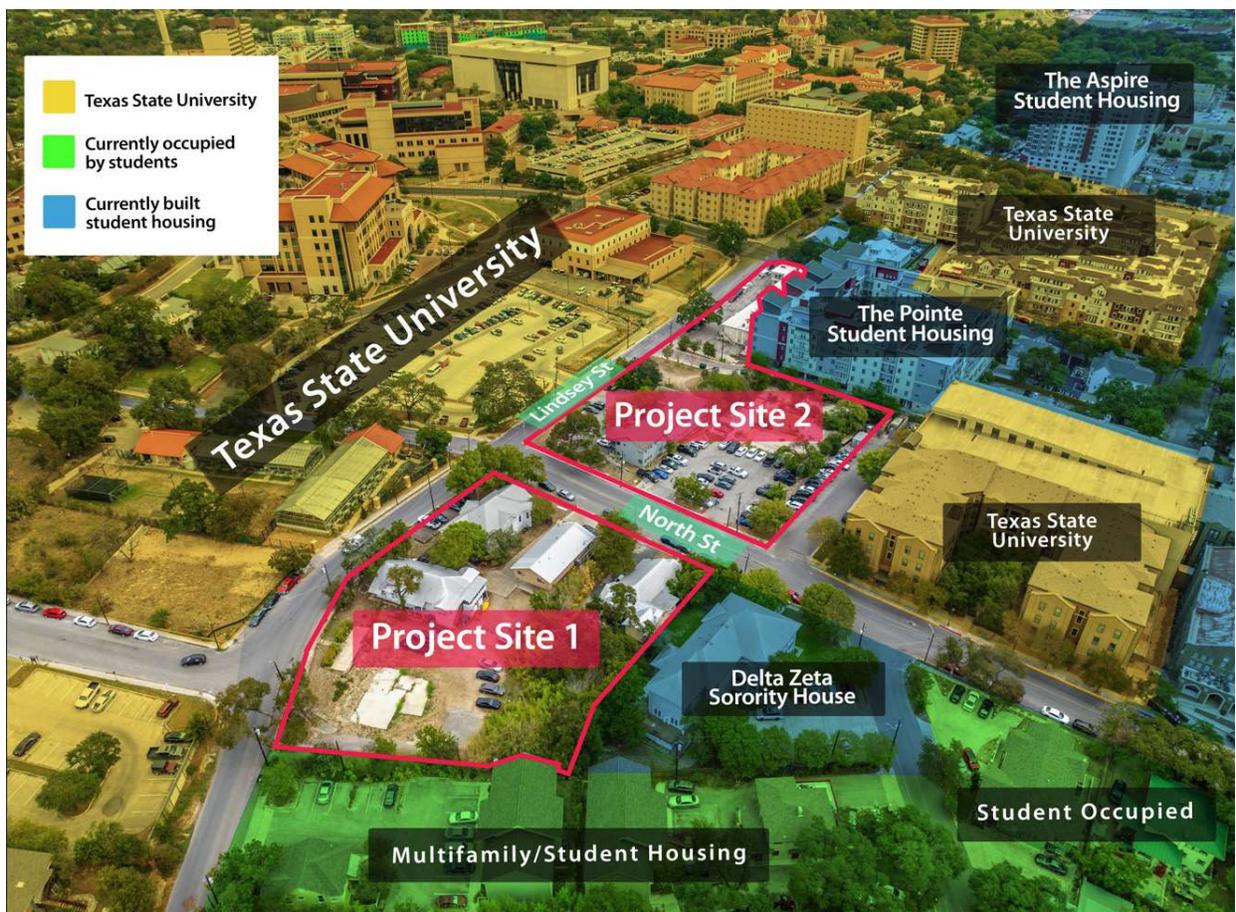

The purpose of these applications is to change the Preferred Scenario map for the Property from Existing Neighborhood to High Intensity per the currently adopted comprehensive plan or Mixed-Use Medium per the proposed unadopted comprehensive plan. Although, the new Comprehensive Plan has not been adopted yet, you can see below what is currently proposed would transition from mixed use medium (purple) to neighborhood medium (lighter yellow) and then back to neighborhood high (darker yellow) before going back down to neighborhood medium. We would like to propose that the map be modified to allow for this transition from mixed use to neighborhood high density and then down to neighborhood medium. These properties are identified below:

In addition, the Developer would like to address some of the concerns we have heard from the neighborhood and Planning Commission. We would like to offer the following restrictions on the west side of North Street properties that are associated with the PSA. The developer is proposing to put restrictive covenants on the property in order to give the City the assurances that the restrictions could be enforced. These restrictions would be adopted with the CD-5D zoning. These properties will no longer need a purpose-built student housing CUP or the alternative compliance based on the proposed modifications listed below:

- Restrict the property to a 4-story maximum in height. (CD-5D allows 5-story)
- Put only traditional multifamily on these lots.
 - Would NOT do rent by the bedroom leases.
 - Would ONLY do a conventional lease. (Leasing by the unit)
 - Design units for individuals and families.
 - Build only 1-, 2-, and 3-bedroom units. NO 4-bedroom units would be built. (PBSH CUP allows 4-bedroom)
 - Market to University staff and faculty as well as families and non-students.
 - Reduce the impervious cover from 100% to 80%.
 - Allow the use of all amenities for all residents.

All of the Property is **currently** zoned multi-family with an allowed height of 4 and 5 story and is surrounded by the University, other multi-family and sorority houses. The Property is not adjacent to residential. Currently, 0.626 acres of the Property is currently zoned CD-5D. We are requesting that the remaining 1.931 acres of property be rezoned to CD-5D to have consistent zoning on all lots to accommodate this project with restrictive covenants on the west side (Project Site 1 below). San Marcos has previously utilized restrictive covenants on numerous projects (Whisper, Balcones, etc) to alter development requirements. This practice is consistent with the published opinion of the Attorney General.

We believe that this location is ideal to accommodate the increased student population, and the need for student housing adjacent to the University but also recognize that there might be staff and faculty of the University that would benefit from a traditional multi-family project adjacent the University. Therefore, we are modifying our request to only seek a CUP for purpose-built student housing on the property located to the west of North Street (Project Site 2). The Planning Commission recommended in favor of the entire site but we believe that a transition to traditional multifamily to the west of North Street would prove beneficial. The adjacency to the

University is an ideal location for this product type allowing students, staff and faculty to walk across the street and be on campus.

We are also requesting an alternative compliance to increase the height of the project from 5 to 7 stories on the east side of North Street. We have provided a 3D rendering below to show the height of the building as it relates to surrounding properties. It's important to note that we removed the alternative compliance from the west side properties and are only seeking to go to 7 stories on the east side, where we are surrounded by other buildings that range from 6 to 14 stories, including a new University project that is 7 stories within 500 feet of our site.

The allowance for 7 stories on the east side of North Street is imperative to the financial viability of the project. This height will allow us to reduce the height on the west side parcels and develop a conventional multi-family site. Some other requirements provided for with the alternative compliance are as follows:

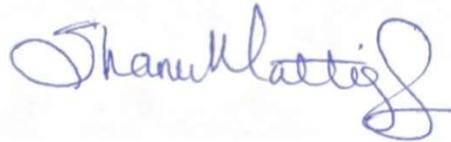

- The project will be LEED Silver certified.
- 20 additional public parking spaces will be provided in addition to the required parking to be met per the Land Development Code.
- An additional 5% open space will be provided above the normal parkland requirements, which will include a plaza/public seating.
- Will include a publicly accessible gym on the ground floor.
- Will include a bicycle maintenance and repair and extra bicycles available to be checked out by residents as needed.

This project is ideal, due to its location adjacent to campus, its proximity to shopping and services within the downtown area that are walkable. It will include an improved pedestrian experience with a well-connected network of streets to accommodate the increased walkability of students without the need to drive to class or to access their cars for work or to shop or access other services.

Staff have recommended approval of our project with certain conditions. The one condition that we would like to have modified is the request not to charge for parking. It is consistent with projects of this type to charge a fee for parking in order to recoup the overall cost of building the parking garage. We would like to have that condition removed as we want to make sure we are transparent in our request and don't want to penalize people who don't bring a car. Residents that do not bring a car will not have the cost of parking which would otherwise be incorporated into the lease.

Please let me know if you would like any additional information or have any questions. Thank you for your time and attention to this project.

Very truly yours,

A handwritten signature in blue ink that reads "Shannon Mattingly". The signature is written in a cursive style with a large, looping initial "S".
