

2018 UPDATE OF WATER & WASTEWATER IMPACT FEES

Public Hearing
City of San Marcos
April 3, 2018

WHAT IS AN IMPACT FEE?

- A one-time, up-front payment levied on new or expanded development for its capital costs of providing service being place on the utility system.
- Intended to mitigate rate impacts arising from the capital costs of new development and <u>help</u> make growth pay for itself.
- Impact Fees in Texas are statutorily addressed in Chapter 395 of the Texas Local Government Code.

WHAT IS AN IMPACT FEE?

- The real issue underlying impact fees and rates is,
 - "Who pays for utility capacity related to growth?"
 - If there are no impact fees, ratepayers carry the costs.
 - o If there are impact fees, the costs are shared.
- The ultimate goal is to assure that:
 - Infrastructure needed to accommodate growth is constructed.
 - Capacity will be available when the development community needs it.
 - Limitations will not be placed on growth due to lack of utility capacity.

BACKGROUND

- Process is defined in Chapter 395 of Local Government Code, as amended.
- Water and wastewater impact fees last updated in 2014.
- Current Impact Fee Fees

Water \$2,285 per LUE

Wastewater \$3,506 per LUE

○ Total \$5,791 per LUE

FEE DESIGN

Overall fees are made up of component fees

Water

- Supply/Treatment
- Storage
- Pumping
- Transmission

Wastewater

- Treatment
- Pumping
- Interceptors

Transmission

Ground Storage

Elevated Storage

Pumping

Treatment

Supply

 Produces a <u>maximum</u> fee amount, subject to Council decision on that or lesser amount.

MAXIMUM FEE DETERMINATION

- Define impact fee service area & land uses
- Estimate water & wastewater utility demands
- Compare to existing capacity
- Identify amount and cost of existing available capacity and new facility needs (10-Year CIP)
- Allocate current & future service demands to facilities

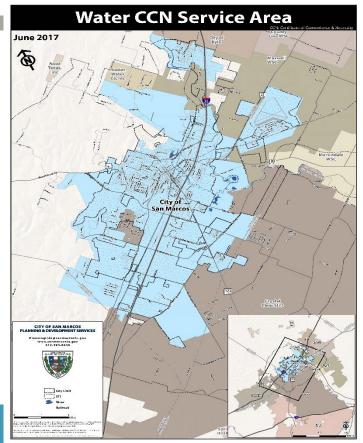

MAXIMUM FEE DETERMINATION

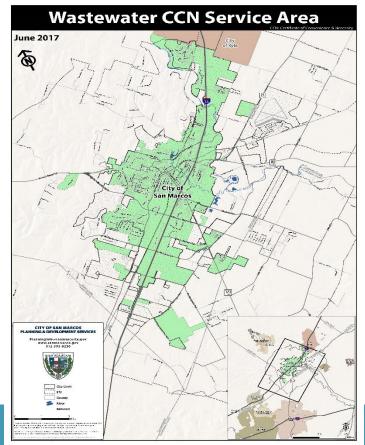

- Calculate weighted cost of existing and new capacity per Living Unit Equivalent (LUE)
- Determine amount of capital being funded through rates per LUE
- Weighted Capacity Cost per LUE

Minus: Rate Credit per LUE

Equals: Maximum Impact Fee per LUE
