<b>DESCRIPTION:</b> The latest camera borne out of DJI and FLIR's partnership, the Zenmuse XT2 is constructed of a rugged, IP44 rated enclosure that houses both a 12MP optical camera as well as a FLIR Tau 2-based thermal camera, providing dual imaging within a single sensor. Like its predecessor, the XT2 can be fully controlled through DJI's Pilot App. Live viewing of both the optical and thermal data feeds, changing of the color palette, setting isotherms, etc. has never been easier. Now with Intelligent Flight Modes, such as Heat Track, where the XT2 automatically locks on and tracks the hottest subject within the scene, and Quick Track, similar to Active Track on the Mavic and Phantom series, thermal imaging has never been smarter.
