SHELTERING

EVACUATING

PRESERVING

ADDRESSING REPETITIVE
LOSS

WARNING SYSTEMS

SIGNS & BARRICADES

Evacuating

Establishing evacuation plans and improving routes: Identifying and equipping potential evacuation routes and improving current evacuation routes.

Improves safety and access for people and first responders.

Sheltering

Disaster Shelter Improvements:

Identifying and equipping a system of shelters throughout the city limits.

Provides accommodations and a secure place for people as a result of a disaster.

Preserving

Establishing Land Banks: Preservation of land in strategic upland and floodplain areas to mitigate flooding.

Land can be used for storage/infiltration of flood waters and the reduction of impervious cover.

Addressing Repetitive Loss

Managing Repeat Loss Properties:

Drainage improvements to properties that have been flooded multiple times.

Construction of public improvements can benefit multiple properties/neighborhoods.

Warning Systems

Improve flood and hazard warning systems: Increasing number of gauges, installing and improving hazard sirens, and improved modeling capability through mapping.

Provides accurate, timely information to the public prior to and during a disaster.

Signs & Barricades

Increase number of warning signs and barricades at low water crossings: This improves safety and protects lives during a disaster.

WHAT IS INELIGIBLE?

- Funding for buildings used for general conduct of government

- Forced Mortgage Payoff

- Enlargement of dam or levee beyond original design

- Assistance to private utilities

- Emergency Response Service (ERS)

Funds may be used to enhance the resilience of facilities
