Mr. Parrish,

This email is a follow-up to the discussion we had earlier today in regards to the property adjacent to the Hays County Juvenile Center and more specifically the requirement of a road between the two properties. As mentioned in our conversation I have several concerns with a road fronting a major portion our property; namely safety and security, confidentiality of our youthful residents and the possibility to introduce contraband into the facility with easy access away from the facility. We already have a major road immediately behind our facility that raises operational concerns, especially since from one of the lanes you can see directly into our out recreation yard. Adding another road beside the facility would only heighten my concerns for our residents and staff.

I would suggest if at all possible not to place a road beside the facility and I am willing to talk to anyone else about my concerns. Please do not hesitate to contact me in regards to this matter.
