RE: KACE - Enterprise Mobile Device Management System

The IT Governance Committee is seeking your approval of a Capital Outlay funded technology request submitted by the IT Department on behalf of the organization

Request Background

This technology will help the IT Departments to securely manage mobile devices around the organization. This software will also help us meet FBI CJIS requirements for managing mobile devices for the Police & Fire Department. We will also be using this product outside of PD and Fire to manage the City's mobile assets. This product also includes additional functionality that will help IT manage devices and improve support around the organization. Funding for this software has been approved through a Capital Outlay Request.

The Committee has reviewed and voted (7-0) on the approval for purchase.

Approved   or   Denied   **Approved   or   Denied**
