☒ Transportation - Multimodal transportation network to improve accessibility and mobility, minimize congestion and reduce pollution

☒ Core Services

☐ Not Applicable

Master Plan: *[Please select the corresponding Master Plan from the dropdown menu below (if applicable)]*

Choose an item.

Background Information:

The Sidewalk Maintenance Program is a maintenance program to identify, inspect, prioritize, maintain, and repair unsafe or non-compliant Americans with Disability Act (ADA), existing sidewalks. The program also serves to meet City Council's strategic initiative for a Multimodal Transportation system to improve accessibility and mobility, minimize congestion and reduce pollution. The program utilizes operational funds and a combination of in-house crews and contracted services to repair the city's existing sidewalk infrastructure. The sidewalk maintenance program focuses on existing sidewalk infrastructure and does not include construction of capital improvement sidewalk projects.

Using citizen feedback from public meetings, email requests, SMTX Connect requests, and GIS analytics, the Public Works Department develops a 5-Year Sidewalk Maintenance Plan. The Sidewalk Maintenance plan prioritizes projects sidewalk issues in underserved and/or high pedestrian traffic areas, avoid tree conflicts, and create connectivity between existing sidewalks. All projects, once complete will meet ADA standards and improve accessibility and mobility for pedestrians around the city.
