San Marcos Electric Utility Master Plan

**Background Information:**

The City of San Marcos received four (4) proposals in response to RFP 220-005 for Outage Management System (OMS). A City-staff evaluation team comprised of subject matter experts evaluated each proposal and selected Milsoft Utility Solutions, Inc., located in Abilene, Texas, as the most qualified to perform the services.

The City currently has an “OMS Lite” which serves some very basic needs in providing outage information, but it does not perform to the extent the City would like. The City recognizes the need for growth and improvement in the areas of manager-worker communication and efficiency throughout an outage and getting near real-time information to the public during outages. The City would like to enhance its public information outreach by providing maps and notifications to affected customers instead of relying heavily upon customers calling in to determine the locations of outages. The Outage Management System to be provided by Milsoft Utility Solutions, Inc., as a result of this solicitation will help the City meet those needs.

The contract will be valid for an initial five (5) year contract with an option to extend for five (5) additional one (1) year periods, for a maximum contract term of ten (10) years. The cost of the initial five (5) year term is approximately \$198,500 and includes the following:

- Total Software Costs (\$66,000)
- System Engineering Services (\$37,500)
- On-site Support Services (\$10,000)
- Technical Support and Software Upgrade - Year 1 through Year 5 (\$71,500)

Additional options are available to the City as requested on a cost-per-option basis. The City requests approval of an amount not to exceed \$235,000 for the initial five (5) year term to allow for any options to enhance the City's services to its customers.
