Background Information:

The City is coordinating with Texas State University on this grant. The grant consists of a \$150,000 in-kind match (\$120,000 from the Edwards Aquifer Authority; \$10,000 from Texas State University and \$20,000 from City of San Marcos) with \$50,000 federal cash grant. The grant goals are to remove invasive plant and animal species (aquatic and terrestrial) and plant native vegetation instream and along the riparian corridor from IH-35 to just below the A.E. Wood State Fish Hatchery (see map). Primary benefits include increased habitat availability for endangered species and native biota, and improved water quality.

The project area expands the scope of the work currently conducted by the existing Edwards Aquifer Habitat Conservation Plan (EAHCP) and extends the habitat enhancement work downstream from the EAHCP an extra river mile, and 0.5 miles upstream into Willow Springs.
