Stormwater Master Plan

**Background Information:**

The attached professional services agreement for \$357,209.50 with Cobb Fendley & Associates (CF), will consist of providing a Preliminary Engineering Report (PER) & 30% Design Phase Services for the Bishop Street Improvements Project. The project scope includes stormwater, water and wastewater improvements along Belvin & S. Bishop to improve stormwater issues downstream along San Antonio Street. The scope also includes a sidewalk and full depth construction within the project limits.

The PER will evaluate four (4) alternative routes for the stormwater to outfall into Purgatory Creek. Once the stormwater route is approved and the final scope is determined, City staff will submit a change in service for City Council approval with Cobb Fendley & Associates to finish the design of the project.

Preliminary construction costs are estimated at \$5-\$6 million. The design will start in the summer of 2018 with construction expected to start in 2020.
