Choose an item.

Background Information:

Due to business needs, two new rate classes are proposed:

- **Large Distributed Generation Standby Service (LDGS)**-This rate class will be applicable for customers that require electric service for lighting, power and any other service other than residential, where the Customer's maximum metered kW demand is 1,000 kW or greater, for which no specific rate schedule is available, and where the customer is capable of generating a significant portion or the totality of their load requirement.
- **Large Independent, Redundant Service (LIRS)**- This rate class will be applicable for customers that require electric service for lighting, power and any other service other than residential, where the Customer's maximum metered kW demand is 1,000 kW or greater, for which no specific rate schedule is available, where the customer requires two or more independent, redundant services.

This rates were presented to the Citizen's Utility Advisory Board (CUAB) and the Board recommended that the rates be brought forward to City Council for approval.
