Background Information:

The City entered into a contract with Tyler Technologies in December 2013 for an enterprise wide financial software that includes accounting, purchasing, payroll, human resources, work order, inventory, and contract management. This change in service will add a new Bid Management Module to the Tyler Munis Financial System. This software will allow the Purchasing division to efficiently manage solicitations and contracts from inception through contract award in the Tyler Environment, while also providing a more user friendly experience for vendors doing business with the City.
