### **Master Plan:**

Vision San Marcos - A River Runs Through Us

**Background Information:**

On August 23, 2016, the Planning and Zoning Commission approved a Replat of Lot 1, Section 3, Interpark East. The proposed replat established Lot 4, Block B, Northgate Center 2. The applicant submitted Public Improvement Construction Plans for the construction of a water line along the front of the lot and those PICPs have subsequently been approved. A Subdivision Improvement Agreement for the improvements was also approved at the time of the Replat approval.

Per section 1.6.5.7 of the Land Development Code, a replat shall remain in effect for a period of two years from the date the application was approved by the Planning and Zoning Commission unless otherwise extended in accordance with Section 1.3.5.1 of the Land Development Code. If the replat has not been recorded within this two year time frame it shall be deemed expired.

On July 24, 2018, the Planning and Zoning Commission approved an extension to the expiration period of the replat for one year. The plat will expire on July 24, 2019. The applicant is requesting a subsequent extension to this plat in accordance with section 1.3.5.1 of the Land Development Code. This second extension of the expiration date of the plat must be approved by City Council and shall not exceed two years. Therefore, the applicant is requesting that the plat be extended with a new expiration date of July 24, 2021.

**Council Committee, Board/Commission Action:**

The original plat was approved on August 23, 2016 by the Planning and Zoning Commission. The Commission approved an extension to the expiration date on July 24, 2018. The plat was expire on July 24, 2019.

**Alternatives:**

n/a

**Recommendation:**

Staff recommends **approval** of the plat with the following conditions:

- **The subsequent approval of the extension of the expiration period shall be for two years (expiration date of July 24, 2021); and**
- **The development shall meet the same water quality requirements for properties located within the San Marcos River Protection Zone (80% reduction in TSS and 1.25" WQV capture) to mitigate for impacts to the water quality zone.**
