Stormwater Master Plan

Background Information:

This project was ranked #1 of four infrastructure projects identified in the City of San Marcos CDBG-DR Infrastructure Feasibility Study performed by AECOM. The Preliminary Engineering Report phase has been completed and the recommended improvements include curb cuts at the intersection of Aquarena Springs and the New Braunfels Frontage Road of IH35, improvements to existing drainage ditch including addition of a maintenance path, additional culverts under Davis Lane and a proposed outfall channel to the Blanco River.

Change in Service #2 is needed to continue with design with new findings and provide additional survey, testing, and structural engineering services for Midtown Drainage Improvements Phase 1. Funding for Phase 1 is with CDBG-DR funds. All items are in line with the additional scope of services in the original contract 218-197 and anticipated upon further investigation of the project.

Council approval is requested for Change in Service #2 in the amount of \$63,577 for Midtown Drainage Improvements Phase 1 engineering services related to the final design and construction phase services for drainage improvements east of IH 35.
